

STABLECOIN MANAGEMENT

- + Stablecoins are tokens that are always pegged 1:1 with the US Dollar. At EDA we take stablecoin management seriously, only working with the best products available.
- + Our platform uses USDC, which is backed by Blackrock and Fidelity Management. We turn your dollars into USDC, then use that initial investment to grow yields ranging from 5% to 25% depending on market conditions.
- + Those yields are then invested in a package of your choosing- from low risk to high risk. People talk about crypto volatility, but volatility works both ways.
- + We offer scalable packages based on personal taste which can be tailored to your liking. These range from low, medium, to high risk, with exposure to the cutting edge of crypto! The question is how much would you like to outperform this decade?
- + Our approach to investing means your initial investment is ALWAYS secure.

YOUR CRYPTO EXPERTS

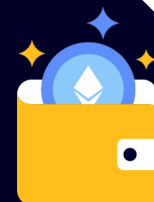

At your fingertips

Eclipse Digital Assets was pioneered by a combination of long term crypto participants and traditional finance professionals. This intersection of skills gives you the best of both worlds: People in the know, and people with track records for success.

Our team has a singular mission: To bridge the gap between traditional finance investors and the world of cryptocurrencies. We have designed our platform to be accessible and educational.

We believe that anyone can use our platform, understand what they are looking at, and build a knowledge base around the most cutting edge financial tools the world has to offer. We believe in transparency and real time updates via our product.

OUR PRODUCTS

Stablecoin Management: In a form of a lend-able digital USD, crypto provides safer and higher returns yearly, while also retaining custody. The lending rate for a Digital USD averages 10%.

Cryptocurrency Risk Tiers: At EDA, we offer three different portfolio options to cover the risk profile for all different types of investors. Our risk portfolios include various stratification of such assets as Bitcoin, Cardano, Ethereum.

Private Capital Asset Hedge: Given the market conditions, we will hedge to properly diversify our portfolio into real estate and wind-powered crypto mining infrastructure. This allows us to create income opportunities in a down trend.

OUR STRATEGY

YOUR RETURNS

The world of crypto offers unprecedented returns for investors. Clients with a time horizon of just 2 years can expect to see aggressive portfolio growth not available anywhere else.

Your investments and earnings are secured via the best tools available: hardware wallets under complete lock down and protection, with deep encryption and multiple levels of security to ensure no one but you can access them.

Your EDA account is protected by an advanced 2 factor authentication process; nothing happens until we are SURE it came from you (or a party you've authorized).

OUR TRANSPARENCY

SafeRamp: SafeRamp is Eclipse Digital Asset's in house on boarding process, provided free of charge, that quickly and veritably puts your money to work.

SimpleScan: In EDAs client portal, you'll be able to view all transactions related to your account through SimpleScan.

EDA Dashboard: We make information easy to understand. Your assets, their performance, are visible at all times and we provide customer support with the touch of a button.
